Latest Technology Trends in Software Industry

Department of Computer Science, Mankar College in collaboration with Career Guidance Cell, Mankar College organized an International webinar on the topic entitled "Latest Technology Trends in Software Industry" on 26th June 2021. The speaker talked about some of the current trends in the software based industry. He also explained why these topics will continue to remain relevant in the coming years and also provide some points to start mastering these topics. Usually, these topics are not covered during a degree program in an undergraduate college, but recently the software industry has adopted most of these topics. With having knowledge of what is happening in the industry, a student can start learning a few of them on their own while pursuing their computer science degree.

Students from various colleges and universities in West Bengal as well as differnet parts of the country attended the webinar. 475 participants registered from different Science departments like CSE, CS, MCA, BCA, B.Sc, M.Sc etc.
